

HYFER PLUS FOLIAR FERTILIZER is a unique blend of properly balanced essential macro and micro nutrients, vitamins, hormones, amino acid, humic acid, and spreader/sticker. Formulated to supplement necessary nutrients for optimum plant development.

GUARANTEED ANALYSIS: GROWTH ENHANCER BLOOM BOOSTER

NITROGEN	22%	8%
PHOSPHORUS	11%	16%
POTASSIUM	9%	24%

DOSAGE AND APPLICATION:

Dilute 2.5 to 4 ml. HYFER PLUS foliar fertilizer in every liter of clean water (40-60ml./16lits). Spray the solution directly to the leaves and young stems of the plant. Best time of application is early in the morning or late in the afternoon.

FERTIGATION:

Dilute 500 to 750ml. in every 200 liters of clean water and fertigate the soil as needed.

FUNCTIONS AND BENEFITS:

MACRO NUTRIENTS (N,P,K,Ca,Mg,Su):

- > Primarily promote early root growth, aid in pollen and seed production and increases plant resistance to stress and diseases.
- > Potassium and Nitrogen, specifically produce greening effect on leaves and quality of fruit.

MICRO NUTRIENTS (B,Cu,Fe,Mn,Zn,Mo):

- > Aids in chlorophyll formation, sugar transport from leaves and stem going to the fruit, and nitrogen processes for photosynthesis and seed germination.

VITAMINS:

- > Organic compounds that enhances resistance and flourish the plant.

HORMONES:

- > Serves as communicators or agents, which help regulate proper plant growth and development.

AMINO ACID:

- > Provides readymade building block for protein synthesis. Directly and indirectly influence the physiological activities of the plant.

HUMIC ACID:

- > Promotes plant health and growth.

SPREADER STICKER:

- > Reduces surface tensions of the solution, helping them spread and cover leaves more effectively, thus, maximizing the efficacy of the active ingredients.
